

NORLEX

POOL & SPA

Instructions of use

Version 1.1, September 2018

Product name: Clean Line

Use: Grooming products

Description

Clean Line is a light alkaline foaming cleaner that is used to remove dirt and grease on liner in the waterline in swimming pools and spa baths. Clean Line can also be used to effectively clean pool covers.

Clean Line can be applied to aluminum and other alkali-sensitive surfaces.

Instructions of use

Spray Clean Line directly onto the liner to form a strong and stable foam on the surface to effectively dissolve grease, dirt and other coatings. Let the product work for 5-20 minutes, while ensuring that the foam does not dry completely.

Flush with water. If needed, use a brush on the treated area to remove all the released dirt and grease.

Temperature range: 0-50 ° C

Contact time: 5-20 minutes. Do not let the foam dry.

Before using the product, read the operating instructions and safety data sheet.
