

NORLEX

POOL & SPA

Instructions of use

Version 1.1, September 2018

Product name: KLOR Minus

Use: Removes excess chlorine

Description

KLOR Minus is used to reduce an excessive content of chlorine or bromine. The content of free chlorine should not exceed 5,0 mg/l.

Instructions

KLOR Minus must not be mixed with other products.

1. Measure the present chlorine content
2. Calculate the amount of "KLOR Minus" needed to reduce the chlorine content to the desired level.
3. Dissolve the product in a bucket with pool water before adding slowly in front of the inlet nozzles.
4. After 30 min. measure again the chlorine content, to confirm the level is in the proper range.

Dosage calculation

10 g "KLOR minus" per 10 m³ pool water lowers the chlorine content by 1,2 mg/l. A high bromine content is reduced by half that amount.

Pool volume	Amount of CHLOR Minus to decrease chlorine content by specified ppm				
	0,6 ppm	1,2 ppm	1,8 ppm	2,4 ppm	3,0 ppm
15 m ³	8 g	15 g	23 g	30 g	38 g
20 m ³	10 g	20 g	30 g	40 g	50 g
25 m ³	13 g	25 g	38 g	50 g	63 g
30 m ³	15 g	30 g	45 g	60 g	75 g
35 m ³	18 g	35 g	53 g	70 g	88 g

Before using the product, you should read the instructions and safety data sheet.
