

NORLEX

POOL & SPA

Instructions of use

Version 1.1, September 2018

Product name: No Stain 1

Use: Iron control.

Description

No Stain 1 is very efficient at removing ochre stains on liner or tiles, caused by precipitated iron or calcium residues in the pool.

Instructions

Before adding No Stain 1, the chlorine content should be 0 mg / l as the chlorine decomposes the product. Remove chlorine by using Klor Minus. Add 1 kg of No Stain 1 per. 20 m³ of water. Dissolve No Stain 1 in small amounts at a time in a clean bucket of pool water and pour the solution in front of the inlet nozzles with the filter pump running. After 24 hours the ochre coatings are loosened and can easily be removed with a pool broom. Regulate the chlorine in the water up to 1-3 mg / l and enjoy your pool.

DOSAGE

1 kg per 20 m³ pool water.

Before using the product, you should read the instructions and safety data sheet.
