

Instructions of use

Version 1.1, September 2018

Product name: Spa Tabs 20

Use: Disinfection.

Description

Slowly dissolving 20 g chlorine tablets to ensure water hygiene in outdoor spa, whirlpool and children's pools with a water content from 500-3000 l. For both soft and hard water.

Instructions of use

For pools "**Spa Tabs 20**" can be added via a chlorine dispenser mounted on the plant's filtration cycle or placed in the skimmer basket. In Spa "Spa Tabs 20" can be added in the pump or if available a tablet dispenser on the pipe system.

In large spa baths and other outdoor tubs, the addition of "Spa Tabs 20" will depend on the water volume and use, but is normally about 1-2 tablet per 1.000 liter per week.

In pools, 10 tablets should be added per 30 m³ of water every 3-5 days.

Avoid over-chlorination - to chlorine dispenser add only the number of tablets for a week's consumption. Check and adjust regularly chlorine, pH and alkalinity to the following values: chlorine from 1,0-3,0 mg /l, pH 7,2-7,6; alkalinity from 80 to 120 mg /l.

If the spa is used a lot, the water should be changed regularly, and the tub cleaned. The hidden piping should be cleaned 3-4 times a year with "Spa Pipe Clean 2". Remove the filter cartridge when the pipe is cleaned.

Residues must be delivered to the municipal waste facility for special waste and hazardous waste.

After cleaning with water, the packaging can be disposed of with household waste.

Before using this product, please read the instructions and safety data sheet.
