

Instructions of use

Version 1.1, September 2018

Product name: Sun Guard

Use: Chlorine stabilizer.

Description

Stabiliser in order to reduce chlorine dissipation caused by UV radiation from the sun. Should not be used in combination with stabilised disinfectants or bromine.

Instructions

100 g of stabilizer in 10 m³ of water will increase the concentration by 10 mg/l.
Measure cyanuric content regularly. Avoid concentrations over 100 mg/l.

Before using the product, you should read the instructions and safety data sheet.
