

Instructions of use

Version 1.1, September 2018

Product name: Spa DeScale

Use: Disinfection.

Description

Liquid descaler for indoor spa baths in rental homes/luxury villas, private homes and hotels.

Instructions

1. Fill the tub with clean water - about 100-150 liter and add 1 liter "Spa DeScale".
2. Start the water circulation, and run the pump for 30 minutes.
3. If the spa is severely calcified, increase the dosing to 2 liters and/or the contact time to a couple of hours.
4. Ensure good ventilation during descaling.

Descaling should be done 1-2 times per year. Spa DeScale does not affect pipes and heat exchanger in the spa bath.

Before using the product, you should read the instructions and safety data sheet.
