

## Instructions of use

Version 1.1, September 2018

## Product name: Spa Descale Power

Use: Disinfection.

### Description

Concentrated powder descaler for spa baths in rental homes/luxury villas, private homes and hotels.

### Instructions

1. Prepare a 0,5% solution, meaning 0,5 kg granules for every 100 liter water.
2. Start the water circulation and run the pump for 30 minutes.
3. If the spa is severely calcified, increase the dosing to 1 kg per 100 liter and/or the contact time to a couple of hours.
4. Ensure good ventilation during descaling.

Descaling should be done 1-2 times per year or according to need. Spa Descale Power in the recommended dosing does not affect pipes and heat exchanger in the spa bath.

Before using the product, you should read the instructions and safety data sheet.
