

Instructions of use

Version 1.1, September 2018

Product name: Sulfuric Acid 20%

Use: pH control.

Description

Liquid acid for pH control.

Instructions

Added via dosing pump, that is controlled by pH meter. Keep pH in pool between 7,2 - 7,6.

If there is no dosing pump and on-line pH control, we recommend using pH Minus for better control of the change in the pH value.

Before using the product, you should read the instructions and safety data sheet.
